What was beyond the bend in the stream was unknown. Both were curious, but only one was brave enough to explore. That was the problem. There was always one that let fear rule her life.

She sat in the darkened room waiting. It was now a stand-off. He had the power to put her in the room, but not the power to make her repent. It wasn't fair and no matter how long she had to endure the darkness, she wouldn't change her attitude. At three years old, Sandy's stubborn personality had already bloomed into full view. You know that tingly feeling you get on the back of your neck sometimes? I just got that feeling when talking with her. You know I don't believe

"It was so great to hear from you today and it was such weird timing," he said. "This is going to sound funny and a little strange, but you were in a dream I had just a couple of days ago. I'd love to get together and tell you about it if you're up for a cup of coffee," he continued, laying the trapped he's been planning for years. The robot clicked disapprovingly, gurgled briefly inside its cubical interior and extruded a pony glass of brownish liquid. "Sir, you will undoubtedly end up in a drunkard's grave, dead of hepatic cirrhosis," it informed me virtuously as it returned my ID card. I glared as I pushed the glass across the table. He had three simple rules by which he lived. The first was to never eat blue food. There was nothing in nature that was edible that was blue. People often asked about blueberries, but everyone knows those are actually purple. He understood it was one of the stranger rules to live by, but it had served him well thus far in the 50+ years of his

room waiting. It was now a standoff. He had the power but not the power to make her repent. It wasn't fair and he had to endure the darkness, she wouldn't change her mind. Sandy's stubborn personality had already bloomed. Yes, she was now the first person ever to land on Venus, a consequence. Her name would be read by millions in school, but that celebrity would never actually be seen by her. Control panel and knew there was nothing that would ever get her. She was the first and it was not clear this would also

could make fudge with just chocolate chips, sweetened extract, and a thick pot on slow heat. I tried it with dark chocolate chips. It's better with semi-sweet chocolate chips. It's better with pretty bad with just the dark chocolate. The best add-ins are marshmallows -- what you get from that is Rocky Road. Minutes from start to fridge, and then it takes about six to twenty pounds you gain from eating it.

Friends. All things in moderation. He looked at the sand. He wondered how many grains were in his hand. Hundreds. "ugh," he said under his breath. She counted. One. She was coming closer. Two. Puffs of breath could be seen coming from his mouth. He stopped beside her. Four. She pulled the trigger of the gun. It showed the scars of being his favorite for years. It wore the feeling that they enhanced his presence rather than the scars. It gave it character and had not overwhelmed to the point of being. The jacket was in its prime and it knew it.

is to be her friends. She'd put out food for them each and every day. She watched as they came to the feeders to gorge themselves. She wondered what they would do if something ever happened to her. She thought of the meals she provided if she failed to put out the food

He wave crashed and hit the sandcastle head-on. The sandcastle began to melt under the waves force and as the wave receded, half the sandcastle was gone. The next wave hit, not quite as strong, but still managed to cover the remains of the sandcastle and take more of it away. The third wave, a big one, crashed over the sandcastle completely covering and engulfing it. When it receded, there was no trace the sandcastle ever existed and hours of hard work disappeared forever.

Things aren't going well at all with mom today. She is just a limp noodle and wants to sleep all the time. I sure hope that things get better soon. The robot clicked disapprovingly, gurgled briefly inside its cubical interior and extruded a pony glass of brownish liquid. "Sir, you will undoubtedly end up in a drunkard's grave, dead of hepatic cirrhosis," it informed me virtuously as it returned my ID card. I glared as I pushed the glass across the table.

She tried to explain that love wasn't like pie. There wasn't a set number of slices to be given out. There wasn't less to be given to one person if you wanted to give more to another. That after a set amount was given out it would all disappear. She tried to explain this, but it fell on deaf ears. She wanted rainbow hair. That's what she told the hairdresser. It should be deep rainbow colors, too. She wasn't interested in pastel rainbow hair. She wanted it deep and vibrant so there was no doubt that she had done this on purpose. His parents continued to question him. He didn't know what to say to them since they refused to believe the truth. He explained again and again, and they dismissed his explanation as a figment of his imagination. There was no way that grandpa, who had been dead for five years, could have told him where the treasure had been hidden. Of course, it didn't help that grandpa was roaring with laughter in the chair next to him as he tried to explain once again how he'd found.

Don't forget that gifts often come with costs that go beyond their purchase price. When you purchase a child the latest smartphone, you're also committing to a monthly phone bill. When you purchase the latest gaming system, you're likely not going to be satisfied with the games that come with it for long and want to purchase new titles to play. When you buy gifts it's important to remember that some come with additional costs down the road that can be much more expensive
